QPX1200 1.2kW PowerFlex dc power supply - 60V, 50A max.

Unrivalled Flexibility

The QPX1200 offers users a level of flexibility that can not be achieved with conventional laboratory power supplies.

With a current capability of 20 amps at the maximum output of 60 volts, its PowerFlex design offers increasing output current with reducing output voltage. The QPX1200 can therefore perform the task of many different power supplies.

Example voltage/current combinations include 60V/20A, 48V/25A, 37.5V/30A, 26V/40A, and 20V/50A.

High precision

With setting controlled by an instrumentation quality 16 bit DAC, the QPX1200 offers high accuracy and stability.

Low noise

Mixed mode regulation with a linear output stage gives the QPX1200 exceptionally low output noise for a unit of this power, and ensures good transient response.

Bench or rack mounting

Unlike most higher power laboratory PSUs, the QPX1200 is equally suited to bench or rack-mount applications.

Output and sense terminals are provided on both the front and rear panels. The case has integral tilt feet, and a 3U rack mount is available as an option.

A wide range of interfaces

The QPX1200 has analog, RS-232 and USB interfaces as standard. An optional LAN (LXI) interfaces will be available later.
